SKILLS

Backend

Python · Django · FastAPI · Node.js · REST API · GraphQL · Golang

Frontend

Next.js · React · TypeScript · Vue.js · Tailwind CSS

Cloud & DevOps

AWS · GCP · Docker · GitHub Actions · CI/CD · Nginx · Cloudflare · Vercel

Database

PostgreSQL · Redis · DynamoDB · Supabase · Weaviate · ChromaDB

AI / LLM

OpenAI · Claude · Gemini · LangChain · LangGraph · LlamaIndex · RAG Pipelines · LangSmith · Prompt Engineering

Automation

n8n · Make.com

EDUCATION

B.Sc. Computer Science & Engineering
United International University · Bangladesh
2018 — 2022

Engineering & Professional Program
B-JET · Japan
2022

ABOUT

Senior Software Engineer and AI Full-Stack Engineer with 4.5+ years of experience building production web applications, AI/RAG systems, and cloud infrastructure. Hands-on across Next.js, React, TypeScript, Python, Django/FastAPI, AWS, Docker, PostgreSQL, Redis, and LLM integrations. Currently working in a hands-on technical lead role, owning architecture, implementation, CI/CD, AWS infrastructure, and engineer mentoring in a Tokyo-based AI product team.

EXPERIENCE

Senior Software Engineer / Technical Lead
Nov 2024 — Present
BrandCloud Inc. (NDI Division) · Tokyo, Japan

- Architected and built **KnowledgeLinks AI**, a multi-tenant enterprise RAG platform integrating OpenAI, Claude, and Gemini with streaming responses, source-cited answers, and LangSmith-based evaluation
- Owned hands-on development across backend, frontend, infrastructure, and deployment using Next.js, Python/FastAPI, PostgreSQL, Docker, GitHub Actions, and AWS, while mentoring engineers on system design and code quality
- Designed and maintained cloud infrastructure, CI/CD pipelines, Nginx configuration, Docker-based deployment workflows, and production monitoring to improve deployment reliability
- Led technical decisions for RAG architecture, prompt engineering, LLM provider integration, document ingestion, retrieval strategy, and evaluation workflows

Senior Software Engineer
Oct 2023 — Oct 2024
BrandCloud Inc. · Tokyo, Japan

- Built and maintained production Django REST APIs, React/Vue.js UIs, PostgreSQL schemas, Redis caching, and backend services
- Led full-stack development of **Benrimono**, an on-demand delivery application with real-time GPS, serverless AWS backend using Lambda and DynamoDB, plus Firebase (GCP) for push notifications
- Introduced the company's first production LLM integrations and helped define reusable AI API and prompt engineering patterns

Software Engineer
Sep 2022 — Sep 2023
BrandCloud Inc. · Tokyo, Japan

- Built and maintained Django REST APIs and React/Vue.js UIs across production services
- Optimized PostgreSQL schemas, Redis caching, Docker workflows, and CI pipelines to improve release reliability

Trainee Engineer
May 2022 — Sep 2022
B-JET · Japan

- Software craftsmanship, Agile delivery, and cross-cultural engineering program in Japan

Software Engineer Intern
Nov 2021 — Apr 2022
W3Engineers Ltd. · Bangladesh

- Shipped production features in Go, Flask, Node.js, and Vue.js for client projects

SELECTED PROJECTS

KnowledgeLinks AI · RAG System
Next.js · FastAPI · OpenAI · Claude · Gemini · LangSmith · PostgreSQL · Docker · AWS
Multi-tenant enterprise RAG platform using Next.js, Python/FastAPI, OpenAI, Claude, Gemini, LangSmith, PostgreSQL, Docker, and AWS. Built streaming answers, source citation, document ingestion, retrieval workflows, and evaluation pipelines.
Private / NDA

Benrimono · Delivery App
Flutter · AWS Lambda · DynamoDB · Firebase · GPS
On-demand delivery platform with real-time GPS, AWS Lambda, DynamoDB, Firebase (GCP) push notifications, Flutter, and web admin features.
Private / NDA

AI Support Copilot RAG
FastAPI · Docker · GitHub Actions
Production RAG backend with document ingestion, chunk retrieval, source-cited answers, FastAPI APIs, Docker, and GitHub Actions CI/CD.
View on GitHub →

AI Workflow Agent Ops
FastAPI · Docker · GitHub Actions
Workflow ops backend with human approval gates, execution tracking, retry handling, and FastAPI APIs.
