SUMMARY

Senior backend engineer and hands-on technical lead (official title: VP of Engineering) with 5 years of software engineering experience, building and running production systems on AWS and GCP. Main stack is Python and PostgreSQL, with TypeScript/Node.js and Go. I built KnowledgeLinks AI, a multi-tenant enterprise RAG platform, and I own the CI/CD, monitoring and incident work for what I ship. I lead a 19-person team in Tokyo, and I proposed and set up BrandCloud's Bangladesh development company, growing it from 2 people to 40. I work in English and speak conversational Japanese.

SKILLS

Backend	Python (FastAPI, Django), TypeScript / Node.js, Go, REST & GraphQL APIs
AI / LLM	RAG pipelines, OpenAI, Claude, Gemini, LangChain, LangSmith evaluation, ChromaDB
Data	PostgreSQL (schema design and changes on live services), Redis, DynamoDB
Integration & batch	External integrations (CRM sync, Firebase, LLM providers), scheduled jobs (GCP Cloud Run Jobs, AWS Lambda), webhooks
Cloud & delivery	AWS (Lambda, DynamoDB, EBS, IAM), GCP (Cloud Run, Cloud Build, Secret Manager), Docker, GitHub Actions, Nginx
Operations	Production monitoring, log-based root-cause analysis, runbooks, cost optimization, Jira & Confluence

EXPERIENCE

Technical Lead / Senior Software Engineer, NDI (AI division) Feb 2025 – Present

BrandCloud Inc. (株式会社ブランドクラウド) · Tokyo · official title: VP of Engineering

- Architected and built **KnowledgeLinks AI**, a multi-tenant enterprise RAG platform on Python/FastAPI, PostgreSQL, Docker and AWS: tenant-aware data model, document ingestion, retrieval with OpenAI, Claude and Gemini, and streaming APIs (featured on PR Times)
- Built a scheduled PDF intake pipeline on GCP (Cloud Run Jobs/Services, Secret Manager, Cloud Build, IAM): PDF → review → CRM sync with an external system, with ops runbooks
- Own AWS infrastructure, Docker deployments, Nginx, GitHub Actions CI/CD and production monitoring; lead production troubleshooting through log analysis and root-cause fixes; cut cloud cost through EBS rightsizing
- Lead a **19-person team** (5 backend, 6 frontend, 3 QA, 3 design, 2 PM): set code review, QA and delivery standards, and mentor engineers on system design and code quality
- Proposed the **Bangladesh development company** to the CEO and led its setup: started remote with 2 engineers, grew to 30, then opened a physical office and handled the setup paperwork; now **40 people** across engineering, QA and HR

Senior Software Engineer Oct 2023 – Jan 2025

BrandCloud Inc. · Tokyo

- Built and maintained production **Django REST APIs**, PostgreSQL schemas, Redis caching and backend services
- Led full-stack development of **Benrimono**, an on-demand delivery app with real-time GPS, push notifications and a serverless AWS backend (Lambda, DynamoDB) plus Firebase
- Introduced the company's first production LLM integrations and defined reusable API patterns for them
- Led the Bangladesh engineering team remotely from Tokyo: hiring, mentoring, code reviews and cross-team delivery

Software Engineer Sep 2022 – Sep 2023

BrandCloud Inc. · Tokyo

- Built Django REST APIs and React/Vue.js UIs; tuned PostgreSQL schemas and Redis caching; improved Docker workflows and CI pipelines for more reliable releases

Software Engineer Trainee May 2022 – Sep 2022

B-JET (JICA program) · Miyazaki, Japan

- Agile delivery, ICT training (ITEE FE syllabus) and Japanese business practice

Software Engineer Intern Nov 2021 – Apr 2022

W3Engineers Ltd. · Dhaka

- Shipped production features in Go, Flask, Node.js and Vue.js for client projects

SELECTED PROJECTS

- **AI Support Copilot RAG** — FastAPI · Docker · GitHub Actions. RAG API with document ingestion, chunking, cited answers, tests and a retrieval evaluation script
- **AI Workflow Agent Ops** — FastAPI · Docker · CI. Workflow backend with approval gates, retries and execution tracking
- **Go URL Health Checker CLI** — Go. Concurrent health checks with a worker pool, retries, timeouts and JSON/CSV export

EDUCATION & TRAINING

B.Sc. Computer Science & Engineering · United International University, Bangladesh 2018 – 2022

B-JET ICT Engineers' Training Program (JICA × Bangladesh ICT Division) · selected as 1 of 40 · Miyazaki 2022

Courses: AWS Cloud Technical Essentials · Playwright Python & Pytest · 330+ Codeforces problems solved

LANGUAGES

English — Professional · Japanese — Conversational · Bengali — Native
